

Clinic visits during COVID19

To all our Meade Medical Clinic patients:

Bottom line: You can access care in person, online, by facetime, by phone.

During the COVID pandemic we are still open and here for your care.

However; we now have multiple ways to see you and care for you and your families.

Virtual visits: almost all insurance companies are allowing us to do virtual visits. Call us and we will set you up with a number and a time to call in order to interact with your provider without coming in.

This type of visit can be great for a lot of routine visits.

In person: We are taking extra precautions to ensure the safety of those who must be seen in person. Sick and well visits are not being scheduled at the same time and we are using different rooms for well child and sick visits. In addition, each room, as always, is cleaned with bleach disinfectant between visits.

We are also not having people sit in the waiting room, but instead going directly to their exam room after check in.

We are also requesting the patient come in alone or with one support person, two parents allowed of course for children and infants.

By phone and email: As always, we will answer questions by phone and email through the patient portal whenever possible.

Delay: We will delay any non-essential visits at this time to a later date.

Questions: Call or email us if you need care and are unsure how to get it. We will also direct you on how to proceed if you believe you have been exposed, or are showing symptoms of COVID 19 infection.

We are NOT equipped to test for COVID19 at the clinic.
